

# Kara – Food Drop

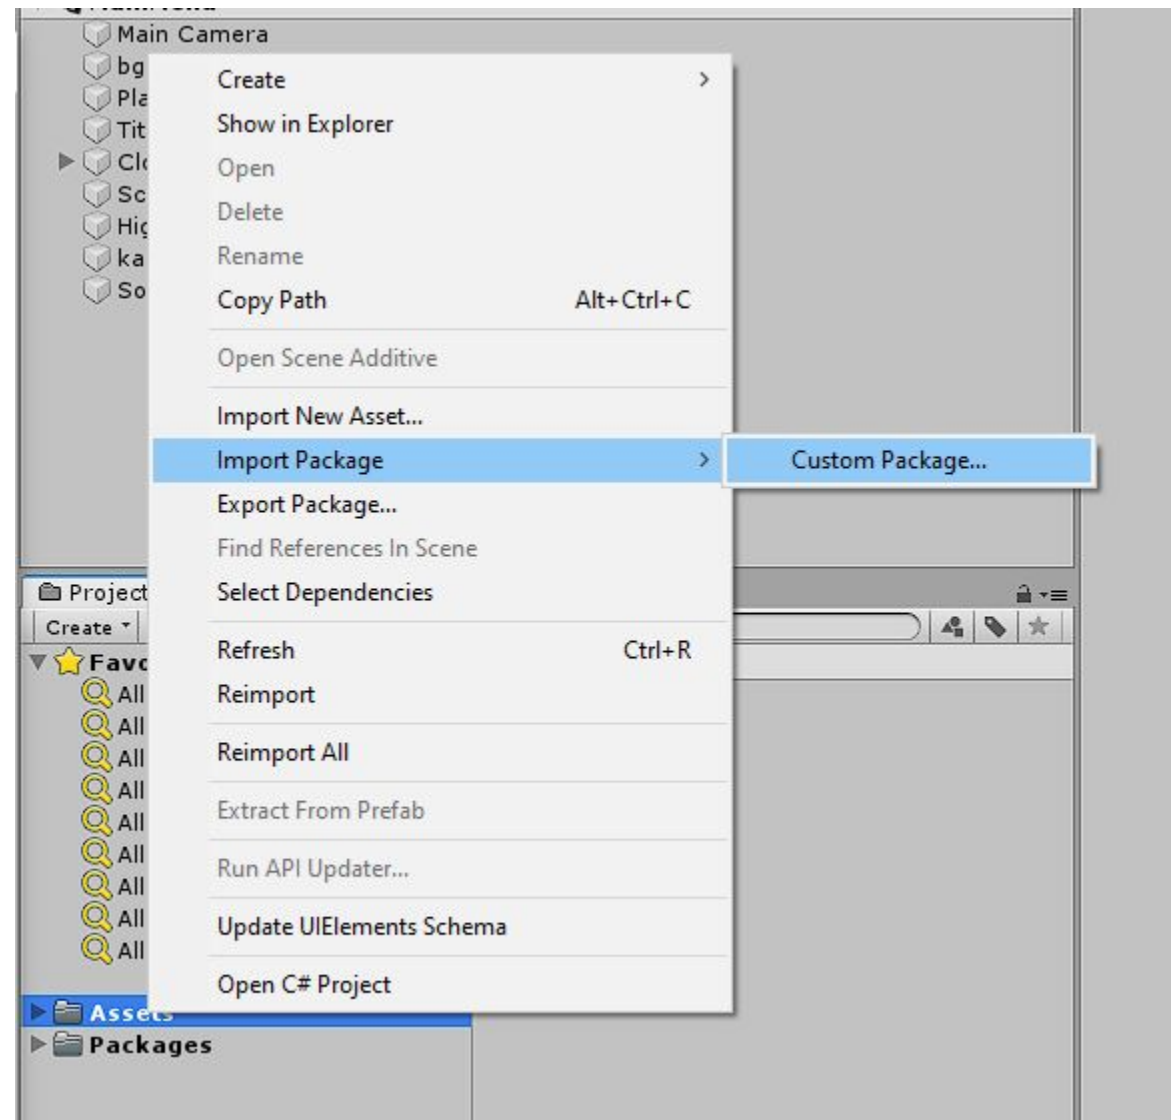

Thank you for purchasing the “**Kara – Food Drop**” game template. This is a full Unity template that gives you a quick and easy way to create a simple kids game or can be used as a starting base to learn Unity and C# programming.

This game can be built for android, iOS & Windows Phone.

It is strongly recommended to import this package in an empty project.

Create a new 2D Unity project and import this template.

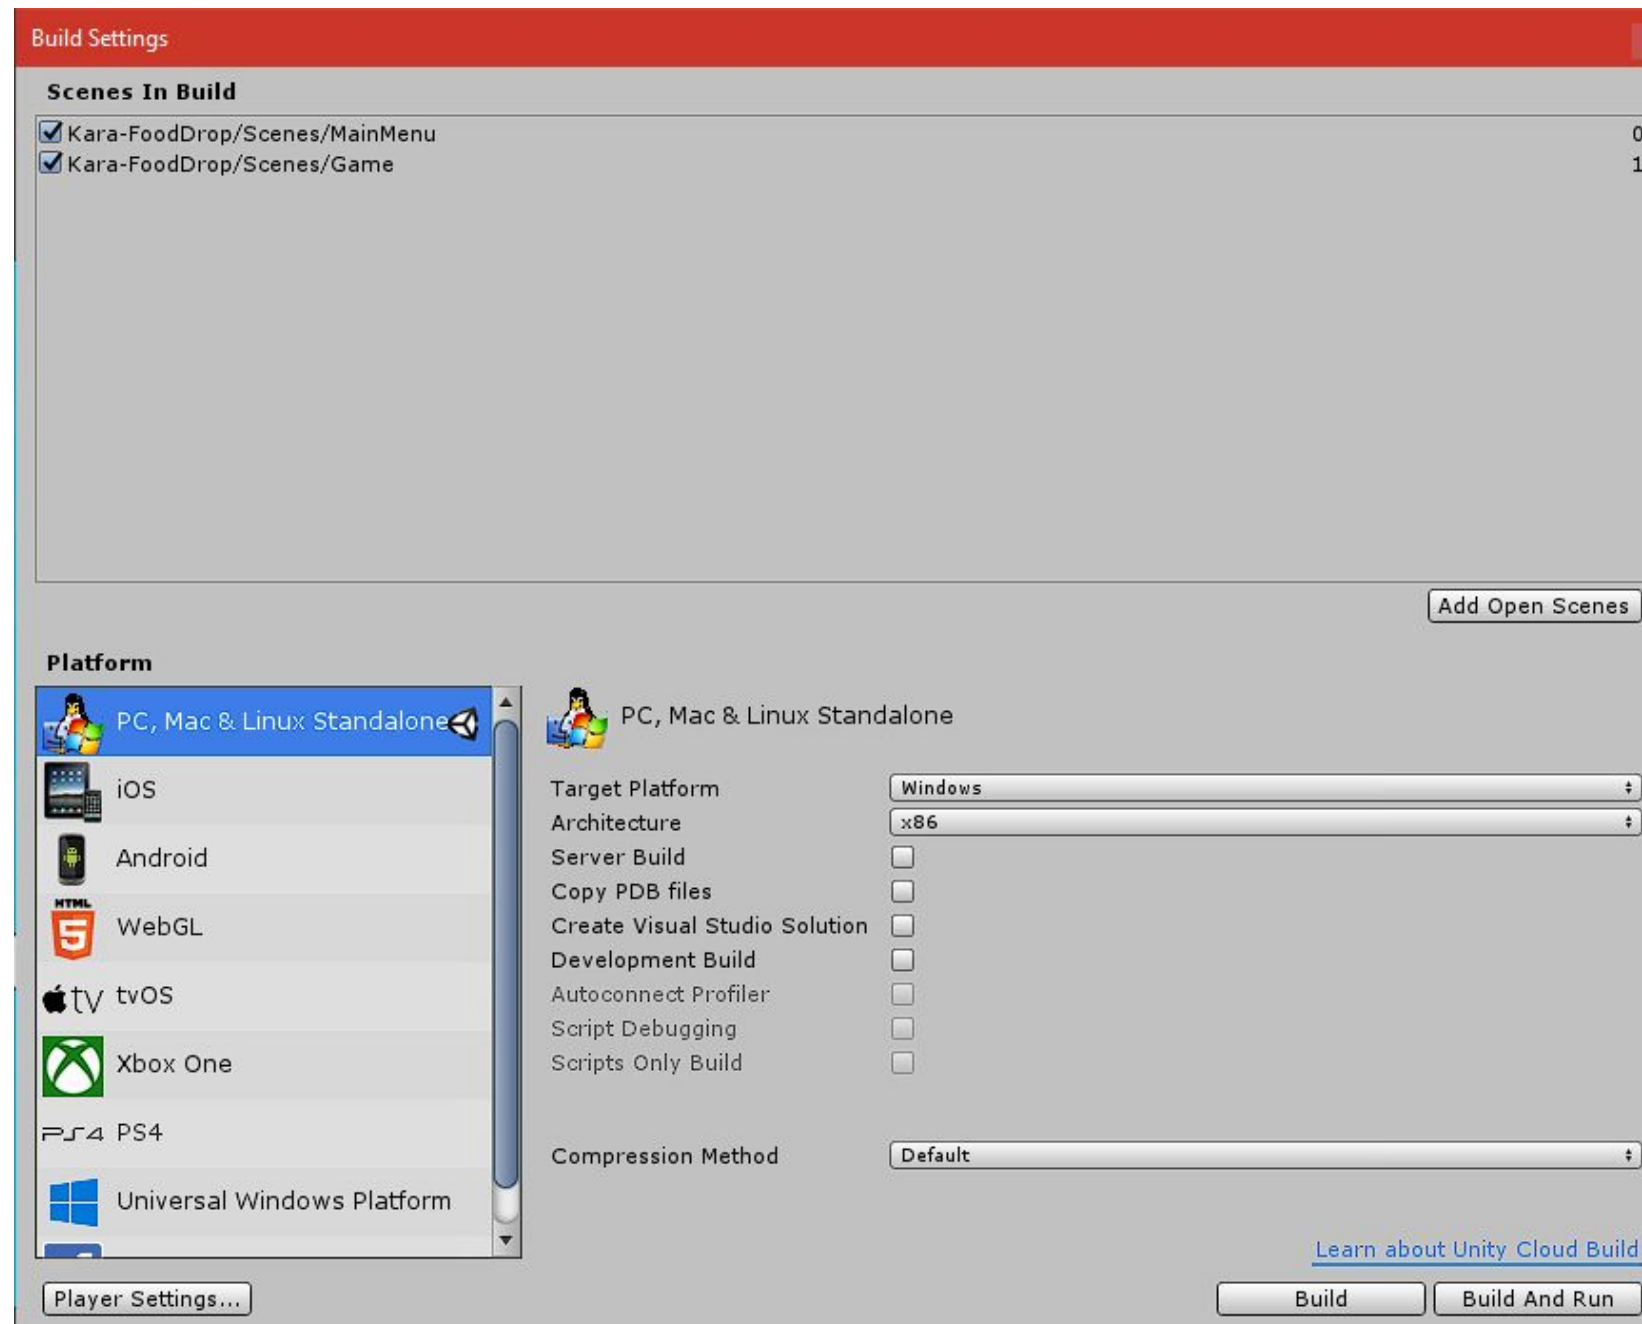

## VERSION HISTORY

- **Version 1.0**
  - Initial release.

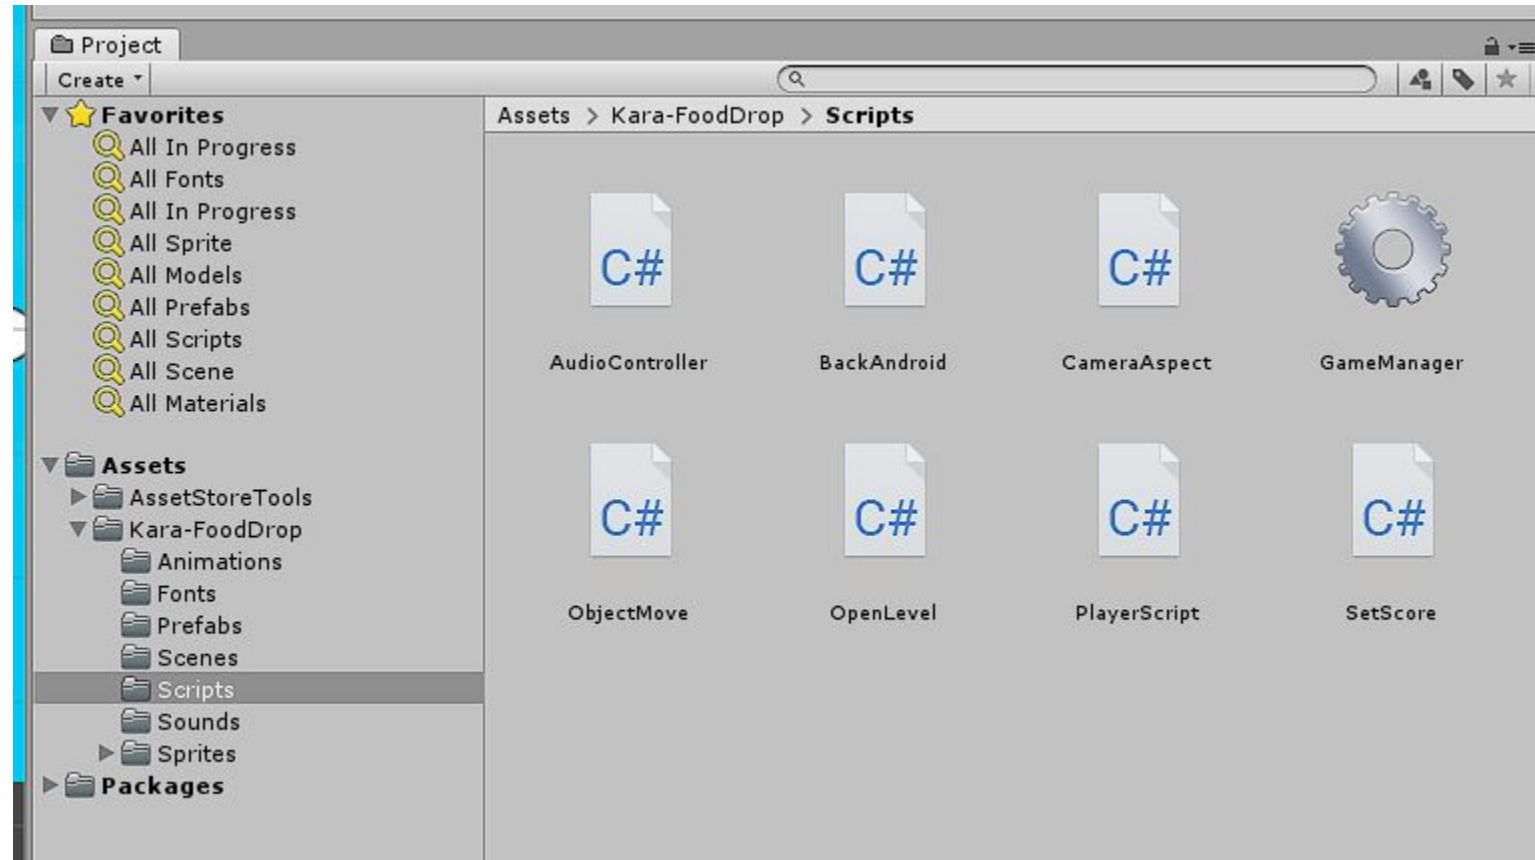

# Build Settings

Make sure you have added these scenes.

# Scripts

All scripts are under the Scripts folder.

AudioController.cs

A script to control the audio Listener of the game.

BackAndroid.cs

A script to control Android back button.

CameraAspect.cs

A very simple script to set the aspect of the camera for any resolution.

GameManager.cs

This script is attached to the GameObject "GameManager".

This script is in charge of the game's logic.

ObjectMove.cs

A script for Move Objects Like food, bomb and ... .

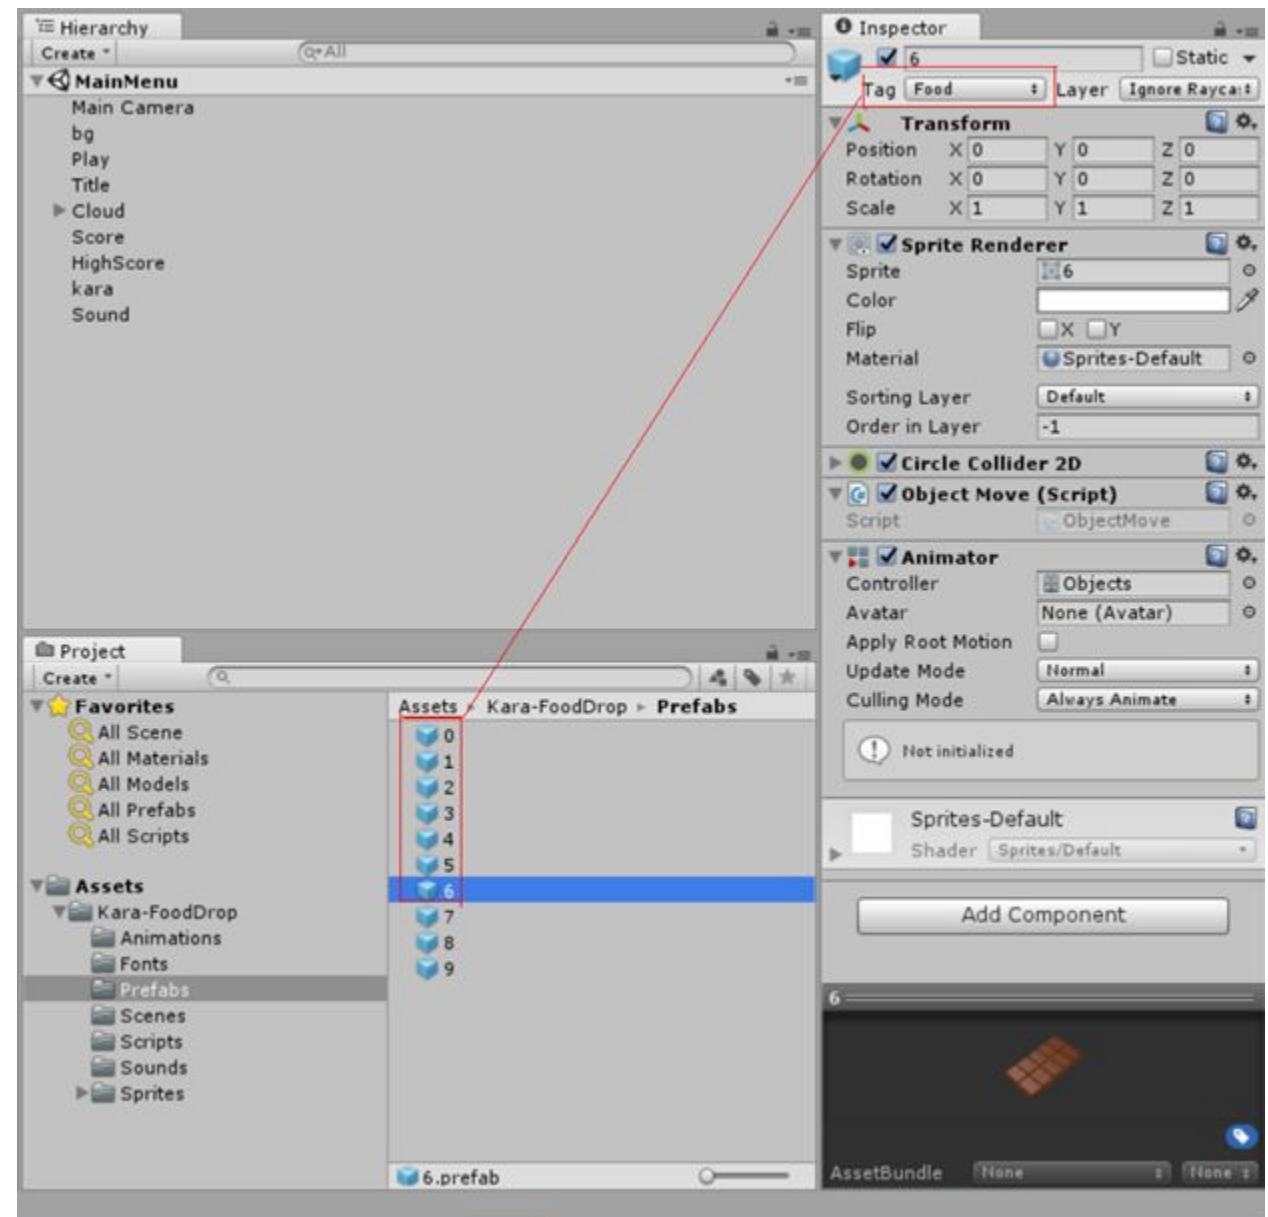

OpenLevel.cs

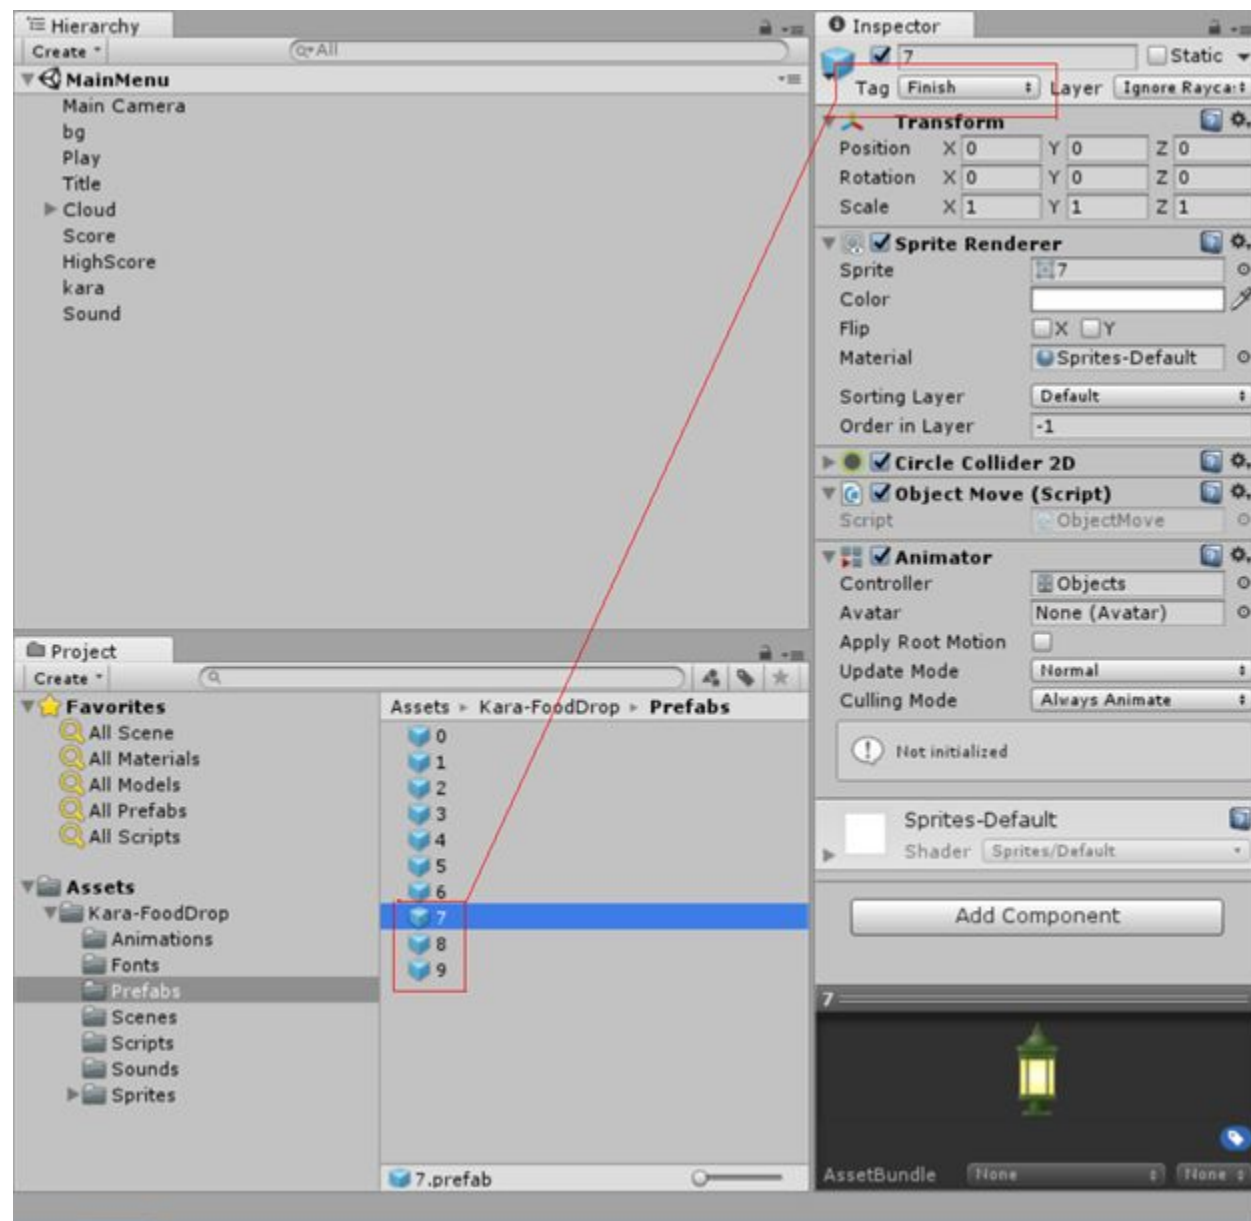

A script to open a new scene.

PlayerScript.cs

This script is attached to the GameObject "Player" and is in charge of detecting the input and moving the player and collision detection.

Important note: after importing unitypackage, make sure that prefabs number 0 to 6 have Food tag and prefabs number 7 to 9 have Finish tag (pictures number 5 and 6).

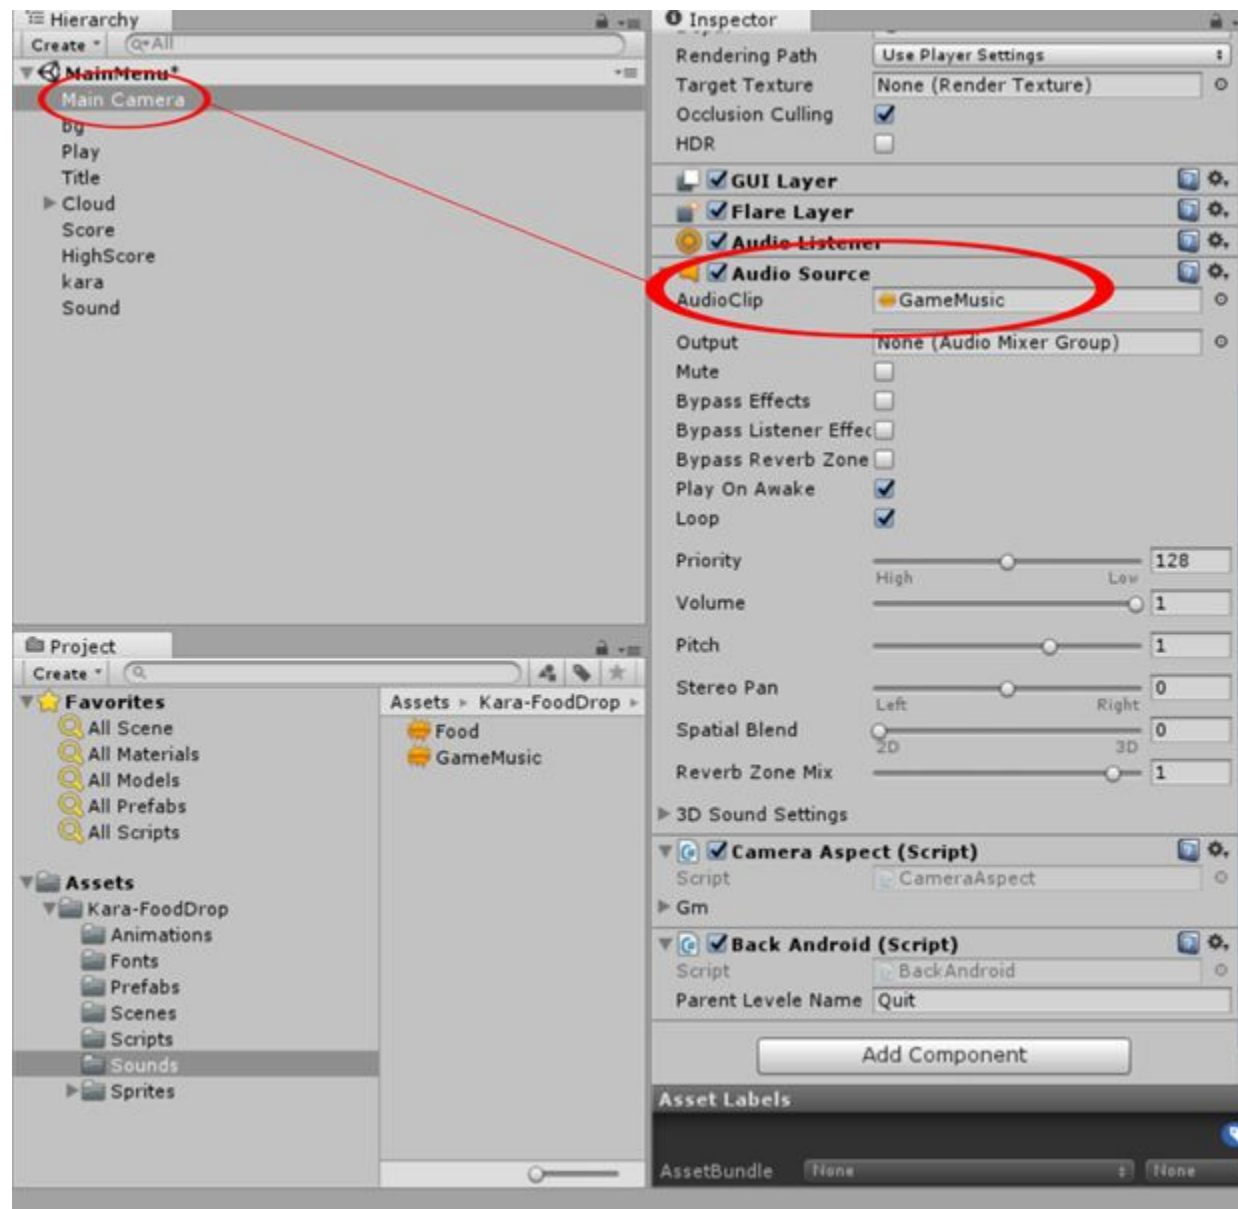

# Music and FXs

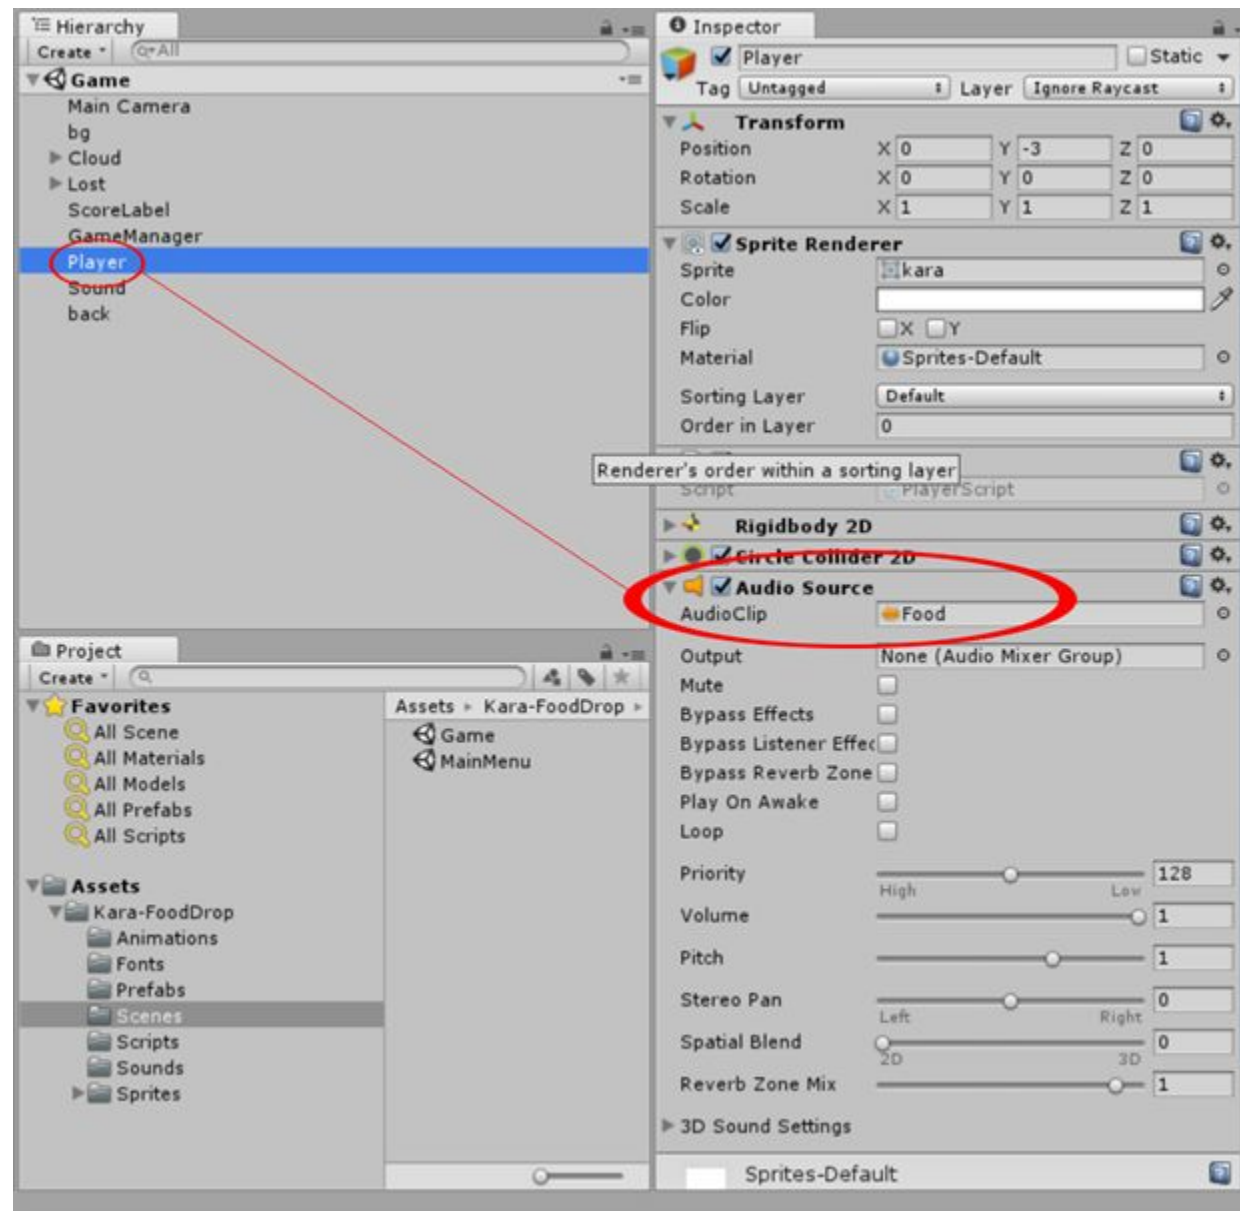

To Change Background Sound: Find the GameObject "Main Camera" and add your Audio Clip in the "AudioClip" field.

To Change Food Sound: In the "Game" scene, find the GameObject "Player" and add your Audio Clip in the "AudioClip" field (see below pictures).

Important note: All of the sounds that are used in the game are in the Sounds folder.

# Reskin

All of the images that are used in the game are in the Sprites folder. You can replace the default images with the new ones that you want.

Important note: For changing the game's default images, new images should have the same size and name as default ones.
